## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-14, and 17, drawn to the first special technical feature, an agent comprising a protein complex, and its first method of use.

Group II, claim(s) Claims 15 and 18-19, drawn to a second method of using the first special technical feature, to diagnose cancer.

Group III, claim(s) 16, drawn to a third method of using the first special technical feature, to prepare a medicament.

2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Inventions I and II, III are related as separate methods of use of the special technical feature of Group I. Groups II and III are the second and third appearing methods of use of the special technical feature of Group I (the agent comprising a protein complex). the methods of Groups I and II or III are separate and distinct from the method of Group I because the methods have different goals, require different method steps and have distinct final outcomes. In the instant case the method of Group I is the treatment of cancer, whereas Group II is the diagnosis

Art Unit: 1642

of cancer, and Group III is the method of preparing a medicament. The methods of Groups I, II, and III have clearly different final outcomes and method steps and thus are patentably distinct.

3. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

4. A telephone call was made to Laurie Stewart on 23 Apr 2001 to request an oral election to the above restriction requirement, but did not result in an election being made.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew O. Wells whose telephone number is 703-308-4521. The examiner can normally be reached on M-F (7:00-4:30), every other Monday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anthony Caputa can be reached on 703-308-3995. The fax phone numbers for the organization where this application or proceeding is assigned are 703-305-3014 for regular communications and 703-305-3014 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0196.
